

# Animal Classification

## Say What?

Studying animal classification can mean learning a lot of new vocabulary. Find five words in this book that you've never heard before. Use a dictionary to find out what they mean. Then write the meanings in your own words, and use each word in a new sentence.

# Animal Classification

## Another View

This book has a lot of information about animal classification. Ask a librarian or another adult to help you find another source about taxonomy.

Write a short essay comparing and contrasting the new source's point of view with that of this book's author. What is the point of view of each author? How are they similar and why? How are they different and why?

# Animal Classification

### Dig Deeper

After reading this book, what questions do you still have about the way the animal kingdom is organized? Do you want to learn more about annelids? Or arthropods? Write down one or two questions that can guide you in doing research. With an adult's help, find a few reliable sources about biology that can help answer your questions. Write a few sentences about how you did your research and what you learned from it.

THE SCIENCE OF LIFE

# Animal Classification

## You Are There

This book discusses the field of zoology. Imagine you are a zoologist studying relationships between animals. What are you interested in studying? How would you get started?
